GENERAL INDEXES  
TO THE  
THIRTY-SIX VOLUMES  
OF  
ENGLISH BOTANY;  
TO WHICH IS ADDED,  
AN ALPHABETICAL INDEX  
TO  
*ENGLISH FUNGI*;  
MAKING TOGETHER,  
A CATALOGUE OF INDIGENOUS BRITISH PLANTS.

---

London :

PUBLISHED BY JAMES SOWERBY,  
*No. 2, Mead Place, Lambeth.*

1814.

## ADVERTISEMENT.

---

IT is with much satisfaction that I publish the Index of a work that, after above 23 years labour, is now so nearly completed as only to require now and then an appendix, containing new or previously doubtful plants, to make it a perfect National Flora, a work that has been attempted in several countries, but, which is very remarkable, has not proceeded nearly to completion in any other, although carried on under the highest auspices, such is the *Flora Russica*, *Flora Austriaca*, *Flora Danica*, &c.\* while an humble Englishman has been so fortunate as to conduct it, with the assistance of private friends and the superior merits of Sir J. E. Smith, M. D. &c. without any material interruption through an ever to be remembered period of calamitous warfare, with which it commenced, and with which it has happily terminated.

I feel highly grateful for the assistance I have received from many friends, the mentioning of whose names adds much value to the work, since it will hand down to posterity a list of nearly all the British Botanists of its time, with the date of their flourishing in the scientific world. It is to me a source of great pleasure to contemplate the number of those that have lived through the period of its publication, and to be able to congratulate them upon the fulfilment of the kind hopes they used anxiously to express, of seeing the close of the work. At the same time, while many others

\* It is worthy of notice, that English Botany contains more figures of the indigenous plants of other European Countries, than the respective works published in them.

have arisen during its progress, I lament that some of my best friends and social companions have departed without that satisfaction, but their ardour for science will not be forgotten. May the peace, at the commencement of which this work ends, long promote the intercourse of British Botanists with their continental Friends, that all may socially partake of the benefits arising from a knowledge of the extent and sublimity of the creation, and become admirers of the numerous blessings continually spread before us.

The Fungi being necessarily a part of British Botany, I have herewith subjoined a list of them as published in English Fungi. To these I have put the initials E. for edible; P. for poisonous; D. for such as are signs of disorder in trees, corn, &c. such as most parasites; R. for rot in houses, ships, &c.

JAMES SOWERBY.

*London,*  
30th September, 1814.

# SYSTEMATICAL INDEX

TO

## THE THIRTY-SIX VOLUMES

OF

## ENGLISH BOTANY.

---

### Class I. MONANDRIA.

#### Ord. 1. *Monogynia*.

	Vol.	Tab.
<i>SALICORNIA annua</i> .....	6	415
——— <i>procumbens</i> .....	35	2475
——— <i>radicans</i> .....	24	1691
——— <i>frutescens</i> .....	35	2467
<i>Hippuris vulgaris</i> .....	11	763
<i>Chara vulgaris</i> .....	5	336
——— <i>hispida</i> .....	7	463
——— <i>flexilis</i> .....	15	1070
——— <i>translucens</i> .....	26	1855

Observe 1.— IN THE SYSTEMATICAL INDEX.

Pentandria Monogynia, HEDERA HELIX is by mistake placed as a species under the Genus Rhus.

2.— In the same Index,

Cryptogamia Musci TETRAPHIS TROPICANA, Vol. XX, Tab. 1421 is to be inserted immediately after Tetraxis pellucida.

TO  
THE THIRTY-SIX VOLUMES  
OF  
ENGLISH BOTANY.

	Vol.	Tab.		Vol.	Tab.
<i>Acer</i> campestre . . . . .	5	304	<i>Allium</i> oleraceum . . . . .	7	488
— Pseudo-platanus . . . . .	5	305	— Schenoprasum . . . . .	24	2441
<i>Achillea</i> Millefolium . . . . .	11	753	— ursinum . . . . .	2	122
— Ptarmica . . . . .	11	757	— vineale . . . . .	28	1974
— serrata . . . . .	36	2531	<i>Alopecurus</i> agrestis . . . . .	12	848
— tomentosa . . . . .	36	2532	— alpinus . . . . .	16	1126
<i>Acorus</i> Calamus . . . . .	5	356	— bulbosus . . . . .	18	1249
<i>Actæa</i> spicata . . . . .	13	918	— fulvus . . . . .	21	1467
<i>Adiantum</i> Capillus Veneris . . . . .	22	1564	— geniculatus . . . . .	18	1250
<i>Adonis</i> autumnalis . . . . .	5	208	— pratensis . . . . .	11	759
<i>Adoxa</i> Moschatellina . . . . .	7	453	<i>Althæa</i> officinalis . . . . .	3	147
<i>Aegopodium</i> Podagraria . . . . .	14	940	<i>Alyssum</i> maritimum . . . . .	25	1729
<i>Aethusa</i> Cynapium . . . . .	17	1192	— sativum . . . . .	18	1254
<i>Agrimonia</i> Eupatoria . . . . .	19	1335	<i>Amaranthus</i> Blitum . . . . .	31	2272
<i>Agrostemma</i> Githago . . . . .	11	741	<i>Anagallis</i> arvensis . . . . .	8	529
<i>Agrostis</i> alba . . . . .	17	1189	— carulea . . . . .	26	1823
— canina . . . . .	26	1856	— tenella . . . . .	8	530
— littoralis . . . . .	18	1251	<i>Anchusa</i> officinalis . . . . .	10	662
— panicea . . . . .	24	1704	— sempervirens . . . . .	1	45
— setacea . . . . .	17	1158	<i>Andræa</i> alpina . . . . .	18	1273
— Spica venti . . . . .	14	951	— nivialis . . . . .	33	2334
— stolonifera . . . . .	22	1532	— Rodii . . . . .	31	2162
— vulgaris . . . . .	24	1671	— rupestris . . . . .	18	1277
<i>Aira</i> aquatica . . . . .	22	1557	<i>Andræda</i> polifolia . . . . .	10	718
— caespitosa . . . . .	21	1453	<i>Anemone</i> apennina . . . . .	15	1062
— canescens . . . . .	17	1190	— nemorosa . . . . .	5	555
— caryophyllea . . . . .	12	812	— Pulsatilla . . . . .	1	51
— cristata . . . . .	9	648	— ranunculoides . . . . .	21	1484
— flexuosa . . . . .	22	1519	<i>Anethum</i> Foeniculum . . . . .	17	1268
— laevigata . . . . .	30	2162	<i>Angelica</i> Archangelica . . . . .	36	2361
— præcox . . . . .	18	1296	— sylvestris . . . . .	16	1123
<i>Ajuza</i> alpina . . . . .	7	477	<i>Anthemis</i> arvensis . . . . .	9	612
— Chamaepitys . . . . .	2	77	— Cotula . . . . .	25	1772
— pyramidalis . . . . .	18	1270	— maritima . . . . .	33	2170
— reptans . . . . .	7	489	— nobilis . . . . .	14	980
<i>Alchemilla</i> alpina . . . . .	4	241	— tinctoria . . . . .	21	1472
— arvensis . . . . .	15	1011	<i>Anthericum</i> serotinum . . . . .	12	793
— vulgaris . . . . .	9	597	<i>Anthoceros</i> major . . . . .	22	1538
<i>Alisma</i> Damasonium . . . . .	23	1615	— punctatus . . . . .	22	1517
— natans . . . . .	11	775	<i>Anthoxanthum</i> odoratum . . . . .	9	647
— Plantago . . . . .	12	837	<i>Anthyllis</i> vulneraria . . . . .	2	104
— ranunculoides . . . . .	5	326	<i>Antirrhinum</i> Cymbalaria . . . . .	7	502
<i>Allium</i> Ampeloprasum . . . . .	24	1657	— Elatine . . . . .	10	692
— arenarium . . . . .	19	1358	— Linaria . . . . .	10	658
— carinatum . . . . .	24	1658	— var. Peloria . . . . .	4	260

— wood	2	79	— little tree	19	1366
Vetchling, meadow	10	670	— long-leaved trian-		
— yellow	17	1167	drous	20	1435

INDEX OF ENGLISH NAMES.

	Vol.	Tab.		Vol.	Tab.
Willow, olive-leaved	20	1402	Wing-moss, matted	36	2526
— plum-leaved	19	1361	— round-leaved	36	2525
— prostrate dwarf	28	1959	— squirrel-tailed	27	1903
— quince-leaved	20	1403	Winter-cress, early	16	1129
— rose	19	1344	Winter-green, chickweed	1	15
— rosemary-leaved	19	1365	— intermediate	28	1945
— shaggy mountain	36	2586	— lesser	3	158
— sharp triandrous	20	1436	— rose-coloured	36	2543
— shining dark-green	26	1806	— round-headed	3	213
— silky-leaved	21	1509	— serrated	8	517
— silky rock	33	2342	— single-flowered	3	146
— silky sand	19	1364	Woad	2	97
— small-leaved dwarf	28	1961	Woodbine	12	800
— sweet	26	1805	Woodruff, sweet	11	755
— tea-leaved	28	1958	Wood-sorrel, common	11	762
— thin-leaved	31	2186	— yellow procum-		
— varnished	27	1937	bent	24	1726
— veiny-leaved	19	1362	Woundwort, ambiguous	30	2089
— white Welch	27	1937	— corn	17	1154
— withered-pointed	33	2333	— downy	12	829
— wrinkled	27	1908	— hedge	6	416
— yellow	20	1389	— marsh	24	1675
Willow-herb, alpine	28	2001	Wormwood, common	18	1230
— broad smooth	17	1177	— sea	14	1001
— chickweed-leaved	28	2000	Wych-elm	32	2248
— great hairy	12	838	Wych-hazel	27	1887
— narrow marsh	5	346			
— pale smooth	10	693	Yarrow, common	11	758
— rose-bay	28	1947	— serrated	36	2531
— square-stalked	28	1948	— sneezewort	11	757
— small-flowered	12	795	— woolly yellow	36	2532
Wing-moss, capillary	32	2297	Yellow weed	5	350
— curling	19	1326	Yew-tree	11	746

Uredo aurea . . .	320	Xylostroma giganteum . . .	326

## NOTES.

1. *AGARICUS GEORGII*—Frequently sold in the young state as *Buttons* and for making Ketchup, but emits no juice and is useless.
2. *AGARICUS MUSCARIUS*—Said to poison Flies and Bugs when steeped in milk, *Linn.* Certain doses give spirits to those who eat of it; larger doses may prove poison, and produce madness and death.
3. *AGARICUS PRATENSIS*, *Champignon*—Sold at market for soups, &c. *A. virosus* is often eaten by mistake for it, and proves fatal.
4. *AGARICUS VIOLACEUS*—Sold in the Markets under the name of *Bluets*; not good for much.
5. *AGARICUS VIROSUS*—One of the most dangerous of Poisons.
6. *BOLETUS HEPATICUS*—The shape of a *Liver*, and cuts with a reddish juice when ripe.
7. *BOLETUS LACHRYMANS*—Often called *Dryrot*: too common in Houses, Ships, &c.
8. *XYLOSTROMA GIGANTEUM*—Oak Leather Rot: too common in our Ships.
9. Tab. 387, Fig. 3, a species of *FIBRILLARIA*, although a sign of slovenliness and loss, has become habitually creditable among Wine Merchants in general.
10. *ÆCIDIDIUM CANCELLATUM*—may be avoided by proper management.

As Mr. Sowerby is anxious to promote the study of Botany, and conceiving that it will greatly assist beginners in their pursuit to attach themselves to particular tribes of plants, he would recommend them to peruse these General Indexes for that purpose, and he observes that he is willing to supply such sets of plates as may be selected; thus, some would prefer the Cryptogamous plants; others, some of the other classes, or the Mints, Roses, &c. The Farmer might wish for the Grasses, the grower of Timber for the Trees, and so each be supplied with his favourite branch without the labour of studying, or the expense of purchasing, the whole. He also proposes supplying 4to. coloured copies of the plates only of any of his works, or even larger, upon receiving sufficient notice from any person desirous of obtaining superb copies.

Mr. Sowerby understands that Mr. G. Sinclair is about to publish an hortus-siccus of the Grasses upon which his Grace the Duke of Bedford has instituted experiments in particular soils, and Mr. Sowerby hopes soon to be able to lay specimens of those soils before the Public, with a view to agricultural improvement.

*Shortly will be Published,*

**MALACOSTRACA BRITANNICA PODOPTHALMATA,**  
or a monograph on the British Crustacea with pedunculated eyes.

Dr. Leach having a desire to elucidate the British Crustaceæ (Crabs, Lobsters, &c.) seeing the necessity of a more perfect knowledge of this interesting tribe, since some which are articles of food in the country, are not known in London, &c. Mr. Sowerby is glad to assist in his part so laudable an undertaking, not doubting but that in such able hands it will be highly useful and instructive.

The first number of this work is expected to make its appearance on the 1st of December; it will contain three coloured plates in 4to. with accompanying descriptions, at 5s. and may be considered as a specimen of the work. The whole will be completed in about 17 Numbers, of which we intend publishing one every three months, or oftener if possible.

No. 3, 4, and 5, of the Supplement to **ENGLISH FUNGI.**  
The first of these will be published Nov. 1st, 1814.
